

Fact Sheet N°4

Certifications and attributes

WHAT MAKES KALLIMA AN ENVIRONMENTALLY FRIENDLY CHOICE?

The middle layer of our coated cover is made of high-yield pulp, which uses **30 to 35% fewer trees** than the Kraft pulping process.

The bleaching process used to make Kallima is **Elemental Chlorine free (ECF)**, meaning no dioxins or furans are released into the environment.

CERTIFICATIONS

The mill that manufactures Kallima was the first North American bleached paperboard mill to achieve **ISO 9001 certification** for its Quality Management System.

Our mill is also **ISO 14001 certified** – a certification class that covers a wide range of operational practices in environmental management.

The company that manufactures Kallima is one of the **leading producers of FSC-certified forest products** worldwide. The **Forest Stewardship Council (FSC)** is an **independent, international organization**. A product bearing the FSC logo has been made from responsible sources meeting the FSC's **strict environmental and social standards**.

Kallima can be made with **10% recycled post-consumer content**, upon request.

With our mill's solid reputation in responsible sourcing, it's clear that Kallima is a great choice from an environmental standpoint.
